I do not sell many kids on reservation as it is ultimately my goal to freshen all the doe kids born within this herd so I can evaluate udders and production capability. That said, there are some limited opportunities to buy bottle kids from time to time.

First fresheners do not have bucks available for reservation. In some instances, we may allow a first freshener buck kid to be sold after evaluating the dam's udder and production ability. Senior doe kid reservations can be discussed via message or phone. Please contact me with specific inquiries at hardwickefarms@gmail.com
