

All kids are microchipped and registered prior to departure. All sires are DNA verified as are many of the Dams. Entire Herd CAE Negative November 2020. Results available and shared with interested parties. The links below are clickable and will take you to the planned pedigree for that pairing. Does that have been scored through ADGA Linear Appraisal have scores listed beside their name below and will help illustrate the strengths and opportunities for improvement of each animal.

Bottle doe kids, when available, are generally priced between \$450-\$600. Most bucks leave as wethers (neutered males) and are priced \$50-\$100 as bottle kids.

I do not sell many doe kids through reservation as it is ultimately my goal to freshen all the doe kids born within this herd so I can evaluate udders and production capability. That said, there are some limited opportunities to buy bottle kids from time to time.

First fresheners do not have bucks available for reservation. In some instances, we may allow a first freshener buck kid to be sold after evaluating the dam's udder and production ability. First freshener doe kid reservations can be discussed via message or phone. Please contact me with specific inquiries at hardwickefarms@gmail.com
